**Some of our esteemed customers**

# Work Together, Work From Anywhere, Work Securely.

- **Business Email**  
Access work email across web browsers, iOS, android and outlook
- **Enterprise Messenger**  
Have instant 1-on-1 or group conversations with team members on a dedicated office messenger
- **Video Conference**  
Meet colleagues, clients, vendors, etc on video calls or in multi participant video and voice meetings
- **Shared Calendars**  
Efficient scheduling that checks invitee availability. You can also delegate your calendar with any of your colleagues.

# Share large files and edit documents together

- **Cloud Storage**  
Save critical data on the cloud drive, access it from anywhere
- **Cloud Sharing**  
Share large files with the team, without large email attachments
- **Online Docs**  
Create & collaborate on documents, spreadsheets or presentations online without the need of any installed office app on your laptop.
- **Shared Mailbox Folders**  
Keep team members in the loop without long email chains

# Secure Your Business

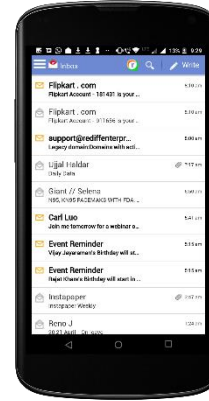

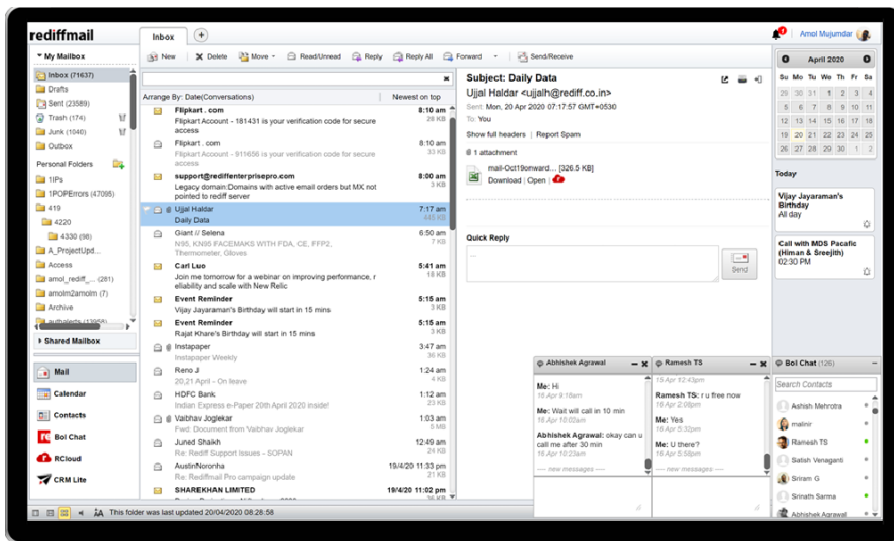

- Anti-Spam & Anti-Virus  
Clean and safe spam-free inboxes
- Email Fraud Prevention  
Work email safeguarded from imposters and scamsters
- Identity Theft Protection  
Get real-time alerts for suspicious access to your account
- End-to-end encryption & Digital Signing  
Send crucial emails and confidential documents securely
- Data Leak Prevention  
Create templates and assign policies to groups to prevent unauthorised data leakage
- Robust Infrastructure  
Assured data safety with servers in Government approved data centres within India

## USPs of Rediffmail For Work

**Customizable pricing.** You don't have to buy one package for all users. You can mix and match packages according to each of your users' needs. Assign pro packages to power users and smart packages to the light users and, thus, optimize costs.

**Add as you grow.** You can buy additional user licenses or extra storage, or add-on features, as you feel the need for them **without an upper limit on the number of users**. This benefit is NOT available with our competitors.

**Use Pooled storage.** Make the most of the space that you're buying by pooling all your users' space and distributing it as per the needs of your individual users. Again, a true USP!

**Get expert professional support on call.** Our competitors provide support only on chat, and through support articles. **On the other hand, we offer free customer support on call** to all our customers so that each issue is attended to and solved based on the nature of the query being presented.

In these challenging times for business, we see an **opportunity!**

With MILLIONS of businesses expected to make a shift online - to the cloud,
